DIRECT PRINTING AND APPLICATION

DIRECT PRINTING

DIRECT PRINTING:
Silkscreen printing machines apply the ink directly onto the product. With direct printing, up to 6 different colours are possible. This process is recommended for large quantities, that need a quick turnaround time and prices well for price sensitive budgets.

KILN FIRED

KILN FIRED:
To date kiln firing processes are the best standard for durability and non-fading printing verses other industry printing options. We do not use UV inks due to the limitations on durability.

BENIFITS OF DECAL PRINTING

- Permanent branding process
- Branding is dishwasher safe
- Scratch and fade resistant
- Branding lasts a lifetime
- Can do multiple colours
- You can brand any shape of ceramic
- High volumes are well priced

CERAMIC DECAL PRINTING is the most popular process and is to date the best industry standard for durability and non-fading versus other industry products.

DOMES

Domes add extra impact and dimension to food or any display. They are always complimentary and add sophistication to crockery and cutlery objects. When utilised as a decorative centrepiece, a dome will add spectacular accents to any table top.

Gastronomy professionals are searching for glasses that satisfy their needs in terms of perfection and sophistication. Their desire: Splendidly elegant table settings with fine, lightweight, extremely transparent products. Their professional needs: Intensive daily use requires products that are highly resistant to shocks and detergents. To meet these **twin challenges of aesthetic excellence and resistance,** The Arc Research Centre is introducing a new generation of lead-free crystal: **Krysta: The high-performance crystal glass.**

THE SHAPE of the side of the glass determines the balance of tastes in one's mouth. When the top of the glass opens outwards or is a more closed-in rim it effects the tilting of your head when drinking which would direct the liquid to different sets of taste buds.

THE SIZE of a glass is a factor in one's perception of a wine's various aromatic layers. One's nose must be able to take in a bouquet's full diversity.

Krysta

EFFERVESCENCE PLUS

Effervescence Plus is a technology that develops an even delicate effervescence, delighting the eyes and taste buds alike.

SHEER RIM TECHNOLOGY

The Chef & Sommelier ® glasses have an extremely fine rim in order to have an optimal comfort during tasting, while keeping an incomparable resistance thanks to the Kwarx ® material.

SOUFFLÉ BOUCHE

The decanters are blown by hand. It makes the product range transcendent.

Drop Control

Drop Control is used on the neck of carafes to prevent drips and it makes wine service more accurate. Drop Control is totally unnoticeable and doesn't change the quality of wines at all.

All the Chef & Sommelier ® glasses and decanters can be recycled.

EXTRA RESISTANT FULLY TEMPERED GLASS = HIGH SHOCK RESISTANCE + THERMAL SHOCK RESISTANT + GLASS SAFETY

SHOCK RESISTANT:
Savings in terms of budget and restocking costs: a tempered glass can be up to 5 times more resistant than an item that has not undergone any specific treatment process.

THERMAL SHOCK RESISTANT:
Tempered products are resistant to variations in temperature of 135°C: they can thus be removed from the oven (or from a salamander) and placed directly in cold water without the risk of breakage.

GLASS SAFETY:
Completely safe for table service: when a shock or series of shocks manages to rupture the exterior shell of the tempered glass, the resulting glass shards are not sharp to the touch.

SHEER RIM — With it's very thin rim, glasses convey the subtlety of the taste and of the aromas.

EFFERVESCENCE PLUS — Effervescence Plus is a technology that develops an even delicate effervescence, delighting the eyes and taste buds alike.

DISHWASHER safe — These items are compatible with intensive dishwashing.

PERFECTLY STACKABLE — Items especially designed to be stackable.

PROFESSIONAL 2000 CYCLES — Items sprayed with innovative inks technically adapted to professional constraints, guaranteed to withstand more than 2000 cycles in industrial dishwashers without damage.
